EVENT

AFL Brownlow Medal Presentation: Telstra Dome

CHALLENGE

To provide seven different projection screens with the main screen forming part of a giant television studio, complete with a massive array of lighting required for this major broadcast event.

SOLUTION

The main screen, and centrepiece, was a 10m wide oval screen with images courtesy of two Christie X6 projectors. Six other screens were placed around the room to ensure the audience of over 2,000 witnessed an event to remember.

Peter Jones commented on the show: "As always, when the really big events are on we need to know that we've got the best technical people on the job. Again, the team at Haycom were instrumental in ensuring that everything ran to schedule and was technically spot on. We couldn't have done it without them!"
